## Dive Rite Fins

On This Page: [Fins](#) | [Pricing](#)

Dive Rite fins offer an excellent combination of performance and value. Their straight-forward design enables you to use these fins for any kind of kick, including frog kicks and modified flutter. They are injection molded from high-quality monprene, enabling you to get the best performance from the least effort. The Extra Large size accommodates oversize drysuit boots.

These fins come with 8-1/2-inch soft stainless steel stretch spring heel fin straps, specifically designed for Dive Rite fins. The design includes a 5-inch rubber heel pad. Ideal for going from wetsuit to drysuit, the one-size-fits-all spring heel is perfect for over-sized drysuit boots.

The Dive Rite fins are available in four sizes. When selecting the size, keep in mind which style suit you will be diving – wetsuit booties or a drysuit.

Fin Size	US Shoe Size	
	Men	Women
Small	Up to 6	Up to 7
Medium	7, 8, 9	8, 9, 10
Large	10, 11, 12	11, 12, 13
Extra Large	13 and up	14 and up

 <p><b>Tek Tip</b></p>	<p style="text-align: center;"><b>Beware of Fin Hyperbole</b></p> <p>Fin designs are an aspect of dive equipment that seem more like fashion trends, and there seems to always be someone promoting "a better mousetrap." Most of these elaborate fin designs work fine when used to move forward at a modest speed using a flutter scissor kick, and the split fin design tests especially well in this regard. However, many designs are poor if you wish to frog kick or use almost any of the swimming techniques preferred by experienced divers in tight spaces. Even with a full scissor kick, the fancy fins are weak when swimming all out against current, or working to overcome the drag of a drysuit or technical equipment. Full foot pockets and elaborate heel strap systems are also more likely cause the loss of a fin in forceful swimming. Be skeptical of those "fin performance reviews" that favor the casual recreational diver; many knowledgeable divers choose a versatile no-frills fin design with stiff blade and a strong, reliable strap at an affordable price.</p>
