BULLETIN 02-16  
May 9, 2016

## **Tonnage Technical Policy Update**

The Marine Safety Center (MSC) has issued Change 8 to [MSC Technical Note \(MTN\) 01-99, \*Tonnage Technical Policy\*](#). This Technical Note provides interpretations of the tonnage regulations (46CFR69) through a reprint of the regulations in standard font, with interpretations inserted in italics font and interpretive figures added in appropriate locations.

MTN 01-99 CH-8 reflects changes for consistency with amendments to the tonnage regulations that took effect on May 2, 2016 (see [MSC Bulletin 01-16](#)), and also includes administrative updates, and formatting and other changes of an editorial nature. Side bars highlight principal differences from the previous version. This Technical Note is available on the MSC's [Tonnage Publications](#) web page, which includes links to other important tonnage policy and guidance documents.

For more information, please contact Mr. Marcus Akins of the MSC's Tonnage Division staff at (202) 795-6787 or [marcus.j.akins@uscg.mil](mailto:marcus.j.akins@uscg.mil).
