

Summary of changes for MLCA Standard Specification 0000_STD, General Requirements, 2006 Edition

Note: Except the deletions, all subsection references correspond to the 2004 Edition of Standard Spec.

GENERAL NOTICE

This provides a summary of changes from the 2004 "General Requirements" standard specification to 2006 version. In general, it includes some format changes, paragraph shifting, consolidation; and in particular, the updating of references in the "Applicable Documents" section.

SPECIFIC CHANGES.

Specific changes incorporated into the 2006 Edition of the "Gen Req" standard specification are as follows:

1. Revised paragraph 3.8 (Occupational safety and environmental requirements) and its associated sub-paragraphs from paragraph 3.8.2 on.
2. Revised paragraph 3.9 (Temporary sanitary and sewage facilities), including associated sub-paragraphs.
3. Revised the contents of paragraph 3.11.1 (Authorized coating systems).
4. Revised the contents of paragraph 3.11.11 (In-process quality control measures) and sub-paragraphs 3.11.11.1 (Technical Representative), 3.11.11.1.1 (Qualifications), and 3.11.11.1.2 (Specific duties).
5. Revised the contents of sub-paragraphs 3.11.11.3.3 (Soluble salt conductivity measurements) and 3.11.11.3.4 (Soluble salt removal), and Table II (Soluble Salt Maximum Conductivity Threshold).
6. Added new requirements for steps to be taken to secure and safeguard all other Government properties, including, but not limited to: removed interferences, GFES, and MTI items.

7. Updated/revised contents of paragraph 5.1
(Definitions).

8. Revised QA Inspection Forms (QA-1 thru QA-5).
