

Standard Procedures for use of Government Owned Generators In SFO Southwest Harbor Housing

(includes CG Housing Jonesport, Southwest Harbor, and Thomaston)

PURPOSE: The following document outlines the distribution and use of government owned portable generators in SFO Southwest Harbor housing units including CG Housing Jonesport, Southwest Harbor, and Thomaston.

PART 1:

1. SFO engineering will be solely responsible for the operation and maintenance of government owned portable generators.
2. Upon loss of utility power to the SFO housing units, SFO engineering will contact Bangor Hydro / Central Maine Power to verify an approximate time of power restoration.

A: If Bangor Hydro reports an estimated time of repair within 4 hours the generators will remain secured.

B: If an estimated time of repair is not given SFO engineering will make the determination based upon the ambient outside temperature and projected forecast and generators will be energized accordingly.

PART 2:

1. Portable generators are only equipped and authorized to be used as an emergency power source for SFO housing units heating systems.
2. Additional equipment will be energized at the discretion of the SFO Engineering Officer.
