Checklist for this item

	Exhibit at least an all-round white light and port and starboard lights.
	 A line drawing of a motorboat with a person at the helm. The boat is shown from a three-quarter perspective. It has an outboard motor at the stern. On the bow, there is a red light on the starboard side and a green light on the port side. A white light is mounted on a pole at the stern. The background is a light gray.
	Check to ensure that all light are operable.
	Ensure light configuration is correct (see references above).

Voyage Termination Warning

Your vessels voyage can be terminated for failing to have correct and operational navigation lights during sunset and sunrise or during periods of restricted visibility.
