

Auxiliarist of the Week

Todd Mains - Flotilla 73

Todd has combined the knowledge gained while qualifying as a watch stander in the Sector Portland Command Center and as a coxswain to standardize the communications procedures between the Sector and Auxiliary facilities. He prepared standard communications scripts for Auxiliary operators to use and conducts ongoing communications workshops.

These efforts have:

- Improved Auxiliary understanding of operational comms.
- Clarified for Auxiliary operators what should & should not be communicated on the radio.
- Given Auxiliarists a better understanding of the internal processes of the Sector's CC.
- Promoted concise & professional radio comms while Contributed to the safe, effective execution of Auxiliary missions.

Todd serves as a superior example of how augmenting Auxiliarists can lead in improving active duty missions.

Todd is also one of the region's first CAN members.
