## New Computerized Rentals

In an effort to make the rental process easier and more efficient we are utilizing new rental software that will allow us to streamline the rental process for everyone. Once a customer file is created for you the information is saved and we won't have to ask all of the questions every time you rent from us. This change will facilitate easier transactions and allow us to evaluate what products are in demand. We hope to use that information to provide you with the products and equipment that you would like to have available for rent.

Unfortunately we are still unable to accept debit or credit cards at this time. We apologize that we were unable to make the upgrades that would allow us to accept those forms of payment.

## New Rental Equipment

We are very excited to announce that we now have two **NEW** sets of golf clubs available for rent. The price is amazing! Cheaper than rentals at the golf course and in excellent condition these clubs are a \$10.00 per day rental item.

Stop by Tropical Rentals and check them out! Other new items are folding chairs for birthdays and weddings. Make sure you check out everything we have to offer and let us know what new items you would like to see.
