

Tracy holds a Certified Energy Manager designation, serving as a Senior Energy Manager for Siemens. She is responsible for developing relationships with key stakeholders within the Local, State, and Federal Governments to facilitate energy saving project opportunities for Siemens multiple lines of business. Her day to day responsibilities also include leading her team in engineering projects, and instructing the end user regarding project performance on Naval Ship projects. The engineered solution, when implemented enhances the Navy's mission readiness by providing each ship with the ability to attain additional time at sea without the need to refuel. After having overcome many obstacles in her life, including childhood and adulthood domestic abuse, homelessness and drug addiction to name a few, Tracy's life's mission is in using her story as an example of bringing positive change in the lives of others. With leadership being at the core of that change, she also works a Certified Leadership Coach on the John Maxwell Leadership Team, frequently performing motivational speaking engagements where she shares her road of overcoming against all odds, to that of tremendous success. When asked to do so, in an effort to give back to the Navy which she credits as the beginning of birthing self assuredness into her life, Tracy proudly participated in a video to increase female participation in Naval recruiting titled "What I Learned in the Navy". She is a member of Leadership Jacksonville Class of 2015; serves as the Vice President of the Board of Directors of the USS Adams Museum; Board Member of the Jacksonville Navy League; USO Board Council Member; and a member of Jacksonville University's Sustainability Degree Advisory Board.
