Weather Advisory

Tropical Storm Harvey is rapidly approaching the west coast of Florida and is expected to make landfall and proceed across into the Atlantic Ocean over the next 24 to 36 hours. Current predictions have the center passing over central Florida with sustained winds of up to 50 knots and gusts up to 60 knots. Threatening winds from Tropical Storm Harvey are possible in coastal South Carolina area within 48 hours.

Please continue to watch the progress of Tropical Storm Harvey and monitor the Broadcast Notice to Mariners for updates on the Port Hurricane Condition. In addition, there may be a rapid escalation of the Port Hurricane Condition should the storm worsen or the track change significantly.
