

Flight Surgeon

- [-] Version 1.0
- [-] Physicians requesting privileges in this specialty must also request privileges in their primary discipline and/or General Medical Officer privileges
- [-] Scope

Privilege(s)	<u>Supported</u>	<u>Not Supported</u>
The scope of privileges for a Flight Surgeon includes the evaluation, diagnosis, treatment and consultation on an outpatient basis of aircrew and special operators. Flight Surgeons are responsible for the care of patients they accompany on transport by rotary or fixed-wing aircraft. These physicians are responsible for identification and prevention of various adverse physiological responses to hostile biologic and physical stresses encountered in the aerospace environment, performance of special operational evaluations and dispositions, evaluation and initial management of decompression illness, and application of operational medicine education to individuals and groups under their care. Flight Surgeons may assess, stabilize, and prepare patients with stable or emergent conditions for aeromedical transport, consistent with medical staff policy.	☑	☐

- [-] Diagnosis and Management (D&M):
