

U.S. Coast Guard Aviation History

Gulfstream C-37A "Gulfstream V"

Historical Information:

The Coast Guard placed an order for a single Gulfstream V with Gulfstream Aerospace Corporation in December 2000 to replace the Commandant's aging C-20B aircraft. Its military designation is C-37A. It was placed in service on 11 May 2002.

It is stationed at Air Station Washington.

C-37A in production. This is a view from across the assembly hangar looking at the right forward fuselage and right wing from the co-pilot's side. Picture taken 28 August 2001.

C-37A moves into the completion hangar. This is where the interior and equipment installations are completed. Photo taken 5 December 2001.

C-37A production flight test.
This is a product flight test on 1 Oct. 2001 that followed the "First" flight on 15 September 2001.
Photo taken 1 October 2001.

C-37A after painting of fuselage.
Photo taken 29 January 2002.
