## Class History:

This class of vessels was one of the most useful and long-lasting in Coast Guard service with 16 cutters still in use in the 1960s. The last to be decommissioned from active service was the *Morris* in 1970; the last in actual service was the *Cuyahoga*, which sank after an accidental collision in 1978. They were designed for trailing the "mother ships" along the outer line of patrol during Prohibition. They were constructed at a cost of \$63,173 each. They gained a reputation for durability that was only enhanced by their re-engining in the late 1930's; their original 6-cylinder diesels were replaced by significantly more powerful 8-cylinder units that used the original engine beds and gave the vessels 3 additional knots. All served in World War II, but two, the *Jackson* and *Bedloe*, were lost in a storm in 1944. Ten were refitted as buoy tenders during the war and reverted to patrol work afterward.

## Cutter History:

The *Faunce* was stationed at Boston, Massachusetts throughout her Coast Guard career. During World War II she also saw service on the Greenland Patrol as well as on escort-of-convoy and patrol duties. She was decommissioned on 13 January 1948.
