**Class history**—The 82-foot patrol boats have mild steel hulls and aluminum superstructures. Longitudinally framed construction was used to save weight.

These boats were completed with a variety of power plants. 82301 through 82313, 82315 through 82317, and 82319 through 82331 were powered by two Cummins 600-hp diesels. Boats 82318 and 82332 through 82379 received two Cummins 800-hp diesels. The 82314 was fitted with two 1,000-hp gas turbines and controllable-pitch propellers. The purpose of this installation was to permit the service to evaluate the propulsion equipment. All units were eventually fitted with the 800-hp diesels. Units remaining in 1990 were re-equipped with Caterpillar diesels.

WPB 82301 through 82344 were commissioned without names; at that time the Coast Guard did not name patrol craft shorter than 100 feet. In January 1964 they were assigned names.

### **Ship's history:**

The *Point Brower* was stationed at San Diego, CA, from 1970 to 1989. She was used for law enforcement and search and rescue operations. On 13 July 1970, she sustained damage in a roll and was disabled 11 miles southeast of Long Beach, CA. She was then towed to San Pedro, CA, by the cutter *Point Judith*. On 25 July 1970, she towed a disabled 19-foot pleasure craft to San Diego. On 28 November 1970, she towed the disabled pleasure craft *Broken* to San Diego.

She has been stationed at San Francisco, CA, since the fall of 1989.
