Class history—The 82-foot patrol boats have mild steel hulls and aluminum superstructures. Longitudinally framed construction was used to save weight.

These boats were completed with a variety of power plants. 82301 through 82313, 82315 through 82317, and 82319 through 82331 were powered by two Cummins 600-hp diesels. Boats 82318 and 82332 through 82379 received two Cummins 800-hp diesels. The 82314 was fitted with two 1,000-hp gas turbines and controllable-pitch propellers. The purpose of this installation was to permit the service to evaluate the propulsion equipment. All units were eventually fitted with the 800-hp diesels. Units remaining in 1990 were re-equipped with Caterpillar diesels.

WPB 82301 through 82344 were commissioned without names; at that time the Coast Guard did not name patrol craft shorter than 100 feet. In January 1964 they were assigned names.

Ship's history:

The *Point Martin* was stationed at Norfolk, VA, from 1970 to 1973. She was used for law enforcement and search and rescue operations. On 16 October 1970, she towed a USN 50-foot utility boat to Cape Charles after it had broken its towline.

She was stationed at Wrightsville Beach, NC, from 1974 to 1983. On 29 January 1979, she towed a disabled F/V from 20 miles south-southeast of Cape Hatteras to safety. On 25 February 1980, she helped seize M/V *Jell II* 50 miles southeast of Cape Fear carrying 1 ton of marijuana.

From 1983, she was stationed at Atlantic Beach, NC.
