**Before You Begin** Normal Expiration of Enlistment type separations do not require prior authorization from CGPC, and will not appear on the airport terminal. For all Normal Expiration of Enlistment type separations, the SPO will start the Separation transaction. After the **Save**, the **Separation Type**, **Termination Date** and **Departure Date** will not be editable. If a mistake is made with the **Separation Type** or **Termination Date**, you will have to Delete the Transaction and insert a new row.

---

**Travel Order Numbers (TONOs) for Separation Orders** The Travel Order Number is generated when the separation transaction is saved by the SPO Supervisor (CGHRSUP Role User). There is no longer any need to request a separation TONO from PCS (SES) please discontinue e-mailing requests for TONO's.

## The RELAD Process

---

**Introduction** This section provides an overview of how the RELAD process works.

---

**Process** This table lists the events that take place in connection with a RELAD. This table is not meant to be all-inclusive; it merely provides an overview of the process to aid in understanding the events that must take place in order for the separation transaction to be input.

Stage	Trigger	Who Does it	What Happens
1	Receipt of e-mail orders from PeopleSoft	Member	Submits Career Intentions Worksheet (CIW) (CG PSC 2045)
2	Receipt of CIW	Member's Command	Endorses CIW and forwards to Servicing Personnel Office (SPO).
3	Receipt of CIW	SPO-Data Entry Technician (CGHRS Role User)	Inputs Career Intentions in PeopleSoft (Note: There are additional requirements listed on section 3-B of the Personnel Pay and Procedures Manual that the SPO must complete in connection with a RELAD.)
4	Receipt of CIW. Updating and saving the separation transaction.	SPO-Data Entry Technician (CGHRS Role User)	Enters the Reenlistment Eligibility Code, and SPD Code for enlisted personnel in the separation transaction and saves. (Note: <b>The separation transaction must be accessed and saved before the user can access the orders.</b> ) Completes orders, entering delay enroute (terminal leave), dependent data, mode of travel etc

6	Completion and saving of orders data entry	SPO-Data Entry Technician (CGHRS Role User)	Finishes the separation transaction, routes to supervisor for approval.
7	Worklist entry	SPO-Supervisor (CGHSRUP Role User)	Reviews and approves separation transaction.  Prints and signs orders and DD-214, forwards to member.
8	Approval and save of separation transaction by CGHRSUP	System	Generates JUMPS transaction (L68B).

### The RELAD Process, Continued

---

**Process (cont)** If the member has never been a Reservist, you must complete the Reserve Status Tab Page prior to creating Orders. This transaction does not require Review and Approval.

**Note:** For Reserve Commission Officers completing EAD contracts you must complete the Reserve Status entry before starting the RELAD. See the special instructions on [page 23](#) of this guide for more information.

If the member has previously been a Reservist, you may complete the Reserve Status Tab Page if the data should change.

The Reserve Status Transaction is separate from the RELAD Transaction and does NOT require Review and Approval but should never be done from the Separation component unless being done in conjunction with the RELAD.

If for any reason a RELAD Transaction needs to be Deleted and the Reserve Status Transaction was done in conjunction with the RELAD, you should Delete the Reserve Status Transaction from the Separation component and prior to Deleting the RELAD Transaction.

If for any reason a Reserve Status Transaction that was done in conjunction with the RELAD and needs to be corrected, you should Correct the Reserve Status Transaction and Save. There is no need to modify the RELAD.

If there is a need to change both the RELAD data and the Reserve Transaction data, complete both changes and Save once. In this case, since the RELAD Transaction was changed, you should route for approval and Save.

## Data Entry

---

**Introduction** This section provides the procedures for Releasing a Member From Active Duty (RELAD) in PeopleSoft.

---

**Procedure** Follow these steps to process a separation transaction. If the Orders Link at the bottom of the Separation Tab Page is available for selection, then the Orders do exist. You should proceed directly to the Orders Page to make your declarations and Save. If the Orders Link is not available for selection, you must complete the Separations Tab Page and the Reserve Status Page and Save.

Step	Action
1	<p>Select menu items in the following order:</p> <p><b>Home &gt; Administer Workforce &gt; Administer Workforce (GBL) &gt; Use &gt; Separations</b></p> <p>Enter the member's employee ID number and click the search button.</p> <p> When choosing a member from the search results, please be sure you are choosing the person you actually want to change data on. Verify the employee ID or national ID before making any changes. Also, since one member can have multiple records if they're both a Regular or Reserve Member and an Auxiliary Member or Civilian Employee, please be sure you are selecting the correct Employee Classification.</p> <p>You can view the status of a RELAD request/authorization in PeopleSoft using the Separation Summary module. You can also access the separation transaction from the Airport Terminal once the Separation Transaction has been started and saved.</p> <p>Click the  button on the row with the member's orders and the separation page will open. See <a href="#">Using the Airport Terminal</a> in the online help for more information.</p> <p><b>For all Normal Expiration of Enlistment type separations, the SPO will start the Separation transaction. After the Save, the Separation Type, Termination Date and Departure Date will not be editable. If a mistake is made with the Separation Type or Termination Date, you will have to Delete the Transaction and insert a new row.</b></p>

### Pay Entitlement Auto Stops for Separations

---

**JUMPS Auto Stops of Pay Entitlements Will Not be Visible in DA Until Data is Synchronized**

Pay entitlements for a member who is being discharged, released from active duty (RELAD), or retired, will automatically be stopped by JUMPS on the effective date of separation. The member's DA entitlements page **will not show the entitlement stop dates** until the SPO Supervisor (CGHRSUP Role User) approves and saves the separation transaction. SPOs do not need to manually stop pay entitlements for a member who is separating, unless the entitlement is to stop on a day other than the date of separation.

### Processing Release From Active Duty Separations for Officers With Reserve Commissions

---

**Introduction** When a Reserve Commissioned Officer completes their initial active duty service obligation/Extended Active Duty (EAD) contract and does not desire to continue on active duty or is not selected for an extension or integration, they are released from active duty and transferred to the Selected Reserve (SELRES) to complete their military service obligation.

---

**Error You May Encounter** When processing these separations (after the separation authority has been entered by CGPC(opm-1)), SPOs often encounter this error message:

**Reason for the Error** DA expects a reserve status row to be present, **with a reserve Employee Classification** (SELRES, IRR, etc.) because the Officer you are separating is a Reservist. However, in most of these cases, the Officer has never been a member of the SELRES and no reserve status row exists.

---

**How to Correct the Error** Exit the separation component, go to the Reserve Member Status page and insert new row. *The Reserve Tra/Pay Cat* effective date must be one day after the RELAD date.

### Processing Release From Active Duty Separations for Officers With Reserve Commissions, Continued

---

#### How to Correct the Error (Cont'd)

When you enter the date, you will receive this warning message informing you that the Employee Class is going to be changed when you save.

This is exactly what you are trying to accomplish. Changing the Employee Class to a reserve classification will allow you to process the separation. Click OK to dismiss the warning message.

When transferring the Officer to the IRR use

- “IRR” for the Employee Classification
- “H - No Drill Requirement” for the Reserve/Training Pay Code
- “Inact Du Officer w/in 8 yr obl” (Inactive duty Officer within 8 year initial military obligation) for the Reserve Classification.

*Reminder:* Use department ID #002817 and position #00062025 when you complete the separation travel order.

If the Officer will be participating in the SELRES following RELAD use:

- “SELRES” for the Employee Classification
- “A – Drilling Pay Status” for the Reserve/Training Pay Code
- “Inact Du Officer w/in 8 yr obl” (Inactive duty Officer within 8 year initial military obligation) for the Reserve Classification.
- Use the department ID and position number provided by the ISC (fot/pf) assignment officer to complete the separation travel order.
