Dear U.S. Coast Guard, The community meeting I attended on Fort Street on Thursday, February 25, 2016 was a sham. The meeting was compromised by multiple members of one organization. Detroit cannot exchange wealth for health. The short term gains of a person already far beyond the reach of poverty should not be allowed to overshadow the needs of people who have already been taken advantage of countless numbers of times by this same organization. The cult of personality built around Detroit's revitalization does not accurately reflect the character nor the needs of the community that would so drastically be effected by this development. As a resident of Southwest Detroit, I'd rather have fresh air than a fatter billionaire. I oppose the progress of the Moroun monopoly (ABC) of transit across the US-Canadian border.

Andrew Newton
