Subject: [Non-DoD Source] Comment on Ambassador Bridge Permit
Date: Sunday, February 28, 2016 11:13:40 PM

Hello,

My name is Denzel McCampbell and I am a resident of the city of Detroit.

There's something that should be clear about the permit for the second span of the Ambassador Bridge second span for the DIBC, there's already a public, emphasis on public bridge on its way. The park is going to happen. There are serious questions to ask, among them: How many international crossings can a neighborhood sustain? How much can residents take in regards to the deterioration of their environment and health? am opposed to a second span, but I urge you all to not make a decision until the DNR gives the DIBC approval to use the riverside park land.

Above all, in the name of residents here today and those who will come tomorrow, and generations down the line, do not act on this request until there is an Environmental Impact Study conducted on the second span. People here have a right to clean air. Act in the interest of the people and do your due diligence and reject the permit for second span

Also, as an additional note, there may be a misconception that many folks were in support of the bridge, especially at the public meeting. However, it was found in a report aired by WXYZ Detroit news, many were paid to make supporting comments.

Please be mindful of everything outlined here.

Thank you,
Denzel McCampbell
