

Gulf Oil Spill Web-Based Rostering Form Invitation

The National Institute for Occupational Safety and Health (NIOSH) invites all workers who are participating in the oil spill cleanup to complete a rostering form via the link below. The purpose of this roster is to obtain an accurate record of everyone who is participating. The information collected in this roster will be important for possible future studies to determine whether health conditions that may develop in the future are associated with occupational exposures during the cleanup. This activity is approved by the Unified Command.

Participation in the roster is voluntary, but NIOSH would appreciate your participation so that if health conditions develop in the future that we are not aware of now, NIOSH will have a way to contact you and tell you about it. The Data Use and Disclosure sheet, which is the first page of the rostering form, tells more about it. Feel free to print that page out and keep it for your records. It has NIOSH's phone number (404-498-GULF (4853)) and email address cdcnioshgulfworker@cdc.gov) that you can call or email if you have any questions later about what you have participated in.

Although the rostering form does ask for personal information, it will only be used so that NIOSH can follow up with you. NIOSH will protect your information as private to the extent allowed by law. NIOSH will only report group information not individual information. The Data Use and Disclosure sheet tells more about this as well.

NIOSH will provide a final written report through CDC to BP, its contractors, the workers, and federal and state government agencies. This report will not contain individual information and will be available to the public.
