- (iii) the Council supported this recommendation and decided to include this recommendation in the proposed draft resolution, as well as to take into account implementation and enforcement criteria and security protocols;

- .4 *ensure the need for regulatory instruments in view of industry standards or common practices;*
 - .5 *ensure that articles or regulations that by nature expire are not unnecessarily kept alive by the instrument; consider introducing a mechanism for the removal of such expired provisions; and*

- (iv) the Council agreed with this recommendation in general but recognized the need for it to be further developed and looked forward to submissions from Member States for consideration at C 114;

 - .2 *encourage that the committees, when considering proposals for developing new, or amending existing, mandatory instruments, also evaluate the cumulative impact of administrative requirements resulting from such proposals; and*
 - .3 *ensure that proposals for developing new, or amending existing, mandatory instruments include possible electronic solutions for fulfilling resulting administrative requirements.*
- (v) the Council agreed, with regard to the Steering Group's proposals on the amendments, to take this recommendation under consideration in line with its decision related to document C 113/3/6 on the review of the GAP.

Recommendation 6: *to encourage the responsible committees to review the pertinent administrative requirements in appendix 7 – and similar requirements in appendix 6 – with a view to introduce an electronic and unified "single window approach" for fulfilling present requirements for multiple reporting.*

11.6 With regard to recommendation 6, the Council supported this recommendation and agreed to forward the pertinent administrative requirements to the relevant committees for review.

Recommendation 8: *the Council takes due note of the stakeholder's concerns about the regulatory framework for maritime security and takes action as it may deem appropriate; and that the Council considers requesting the relevant committee to ensure that actions are taken to remind users of the reasoning for the introduction of the ISPS Code.*
