Subject: Commencement of Round 3 Work: SLF TM Convention CG (Deadline Friday 21Sep2012)

Good day to you all,

This email is to advise you of the commencement of the Round 3 work. Per the Action Plan, I have posted the preliminary draft report of the group to the Sub-Committee, along with a related information paper, and invite any comments on either document by Friday, September 21st. These documents are both Adobe .pdf files, and are available at:
<http://www.uscg.mil/imo/slf/cgdocs.asp>.

You may provide comments in any form (Adobe "Sticky Notes", scanned copies of hand-written mark-ups, comments within the body of an email, etc). I intend to post MS Word versions of the applicable documents (including annexes) within the next week, so that you may make comments in MS Word, if you so choose. Once I have received comments, I will incorporate them in the final draft versions of these documents for circulation to the group, or will otherwise resolve them.

Note that these preliminary draft documents are intended to serve as a basis for initial input from the group, so they are not as "polished" as would be the case if only one draft was to be circulated. Consequently, there are gaps (in some cases indicated by square brackets), and there are also assuredly some formatting, editorial and stylistic errors. In addition, the text and results data have not yet been thoroughly checked regarding accuracy. Accordingly, for these draft documents, I am more interested in comments regarding scope and overall content, rather than detailed comments on specific language (although those are welcome as well). Please recognize also that I must consider a 20 page limit for the group's report (which I am up against, at the moment).

Unfortunately, the U.S. Coast Guard has not resolved the issues with the "missing emails", so always make sure that I acknowledge receipt once you have sent me something; otherwise, it may not have made it through to me. Try omitting attachments if I do not acknowledge receipt of an email.

If you have questions or comments on this email, the website, on anything else related to the tonnage work before the SLF Sub-Committee, please do not hesitate to call or email me.

With my best regards to you all,

Peter Eareckson

Coordinator

SLF TM Convention Correspondence Group
