Adding Propulsion Modes

Adding Propulsion Modes (Engineering Officer)

Per 46 Code of Federal Regulations (CFR) 11.502:

(b) If an applicant desires to add a propulsion mode to his or her endorsement, the following alternative methods, while holding a license or MMC endorsement in that grade, are acceptable:

1) Four months of service as an observer in the same capacity as their endorsement on vessels of the other propulsion mode

2) Four months of service as an engineer officer at a lower level on vessels of the other propulsion mode

3) Six months of service as oiler, watertender, or junior engineer on vessels of the other propulsion mode

4) Completion of a Coast Guard approved training course for this endorsement.

(c) Applicants for an original, raise in grade, or increase in the scope, of an engineer license or MMC endorsement, other than an increase in horsepower limitation, who have not previously done so must meet the requirements of § 11.205(d) of this part.

Examples of Adding Propulsion Modes (not including Gas Turbine):

Adding Propulsion Modes (Gas Turbine)

**Navigation and Vessel Inspection Circular (NVIC) 02-01** is the official guidance on adding a gas turbine propulsion.

Per NVIC 02-01, Engineers who began qualifying service or training on or after August 1, 1998, and who wish to use this service toward an engineering credential and/or corresponding international credential for service on gas turbine vessels must do the following:

- 3Rd A/E, Assistant Engineer (Limited Oceans) or DDE Unlimited – Must complete a Coast Guard approved operational Gas Turbine course.

- 2nd A/E – If gas turbine is not held at the 3rd A/E level, the mariner will need to complete a Coast Guard approved operational Gas Turbine course as well as having 60 days of sea service as Engineer Watch Officer on a gas turbine vessel. If the gas turbine endorsement is already held at the 3rd A/E level, the gas turbine endorsement will carry over to 2nd A/E credential provided the applicant has at least 60 days of licensed experience on gas turbine vessels.
• Chief Engineer Unlimited or 1st A/E – If gas turbine held previously the mariner will still need to complete a Coast Guard approved management level gas turbine course. If gas turbine was not held previously, the mariner must complete the course as well as 60 days of service as an Engineer Watch Officer on gas turbine vessels.
