Notes on Deficiencies

Two distinct types of deficiencies may be identified when utilizing this compliance checklist:

1. *Facility is not operating in accordance with its approved/submitted FSP or ASP* – This type of deficiency is addressed utilizing a range of enforcement and compliance measures, from Lesser Administrative Actions (work lists, etc.), up to and including more significant measures such as Notice of Violations, Civil Penalties, and Operational Controls, which may restrict facility operations.
2. *Facility is operating in accordance with its approved/submitted FSP or ASP, but plan does not meet the specific performance criteria outlined in the regulations* – This type of deficiency must be addressed through the plan amendment guidance as set forth in 33 CFR 105.415 (*excerpt provided below*).

“(a) Amendments to a Facility Security Plan (FSP) that is approved by the cognizant COTP may be initiated by”... “(ii) the cognizant COTP upon a determination that an amendment is needed to maintain the facility’s security. The cognizant COTP will give the facility owner or operator written notice and request that the facility owner or operator propose amendments addressing any matters specified in the notice. The facility owner or operator will have at least 60 days to submit their proposed amendments. Until amendments are approved, the facility owner or operator shall ensure temporary security measures are implemented to the satisfaction of the COTP.”

Generally, items in the checklist beginning with “*verify procedures*” indicate issues requiring plan amendments. These sections include, but are not limited to:

- Facility personnel with security duties
- Facility personnel without security duties
- Facility recordkeeping requirements
- Communications
- Declaration of Security (DoS)
- Security systems and equipment maintenance
- Security measures for access control
- Security measures for newly-hired employees
- Security measures for restricted areas
- Security measures for handling cargo
- Security measures for delivery of vessel stores and bunkers
- Security measures for monitoring
- Security incident procedures
