In regard to the Ambassador Bridge twin span proposal, I would like to see this plan denied. The reason the new Gordie Howe bridge is to be built is to get the traffic away from the residential areas and the University of Windsor in order to improve the air quality there. So far the Marouns have all kinds of property in that area that is just boarded up and rotting, drawing vagrants and arson in that area. It used to be a beautiful neighbourhood and now is a real eyesore. Please let us have our neighbourhoods back in that area and made livable again. Also, have you seen the condition of the bridge close up lately? My son has to travel over it weekly and has taken pictures of the rust, holes broken railings. holes in the floor bed etc. If the Marouns have so much money for all these law suites, they need to use some of it to repair the existing bridge and bring it to a safe condition.

Thank you for the opportunity for the public to voice our opinions. We hope your decision will be a favourable one for the people living in the Windsor area as well as Detroit.
