Dombroski	1209 Campbell St.	48209	thomasdombroski@sbcglobal.net	Regretfully stating the officials who operate directly and indirectly DIBC can not be trusted to keep their word. In the past they have signed or agreed to contracts for performance. Thereafter, these same officials denied or tried to change the aspects of such agreements. Two of these officials were eventually sent to jail in violation of certain court orders. To put it very simply: IF YOU PUT A WOLF IN SHEEPS CLOTHING, WHAT DO YOU HAVE?

					I reside & own my historic home & rental also rental property within Hubbard Farms Historic District (HFHD) that includes West Grand Blvd, 2 blocks from the existing Ambassador Bridge. Our HFHD is a densely populated neighborhood and deserves to be protected and have a healthy, safe, quality of life and we, the People demand a Full Environmental Impact Study (EIS) to be conducted because of Detroit International Bridge Co.'s (DIBC) desire & requests to build a 2nd Bridge that will have at least six (6) driving lanes thus, adding two (2) more driving lanes compared to the Ambassador Bridge that only has four (4) driving lanes. The increased driving lanes would thus, have much more capacity to move many more trucks at any one given time at this concentrated location, throughout each day & night and warrants a full EIS. DIBC's desire is not to build an exact replacement bridge of their Ambassador Bridge with 4 lanes, but to build a completely different bridge that is much larger, wider bridge with at least 6 - 8 driving lanes. The adjacent residential neighborhoods of HFHD, Hubbard Richard, Corktown, Riverfront, and Southwest Detroit need to be protected from increased concentration of air quality pollution concerns, sound & vibration concerns, etc.,...24/7. Please ensure our the People's behalf that a Full EIS is conducted and we, the People are protected! Sincerely, Deb Sumner

					The Ambassador Bridge Company has yet to do anything with several property sites they own, especially what used to be our beautiful train station that I look at every day from my home and wonder"when will they be accountable for their lack of attention that is needed?". I fear that the answer is that they never will. Please help us retain what little access we have left to this public riverfront park.

					I do not support a privately-owned international bridge crossing, as stated initially before the Gordy Howe International Bridge location was decided upon. The air quality in Southwest Detroit is the worst in the State of Michigan. The Moroun family has repeatedly used its financial resources to fight against protecting this community from the myriad health and quality of life issues and to maintain the present Bridge and has been a bully of a corporate neighbor. The changes required in the engineering of a new bridge would be an international eyesore at best. Increasing truck traffic in Detroit by any means is a travesty since the air quality here is already the worst in the state. The impact on the surrounding neighborhoods of both southwest Detroit and Windsor has repeatedly been stated through past years and can only be reiterated yet again! We need eminent domain considerations only from here on out.

					This company failed in its attempt to steal this parkland, so they illegally sent environmental "experts" to find contamination in the soil so they could keep it closed for public use. Now they've decided to make an illegal deal with the Mayors office to swap other contaminated land for the contaminated park soil they've so desperately needed for a twin, second, or whatever they decide they want. It's underhanded. PERIOD!!
