I urge you to not approve the permit for the second span of the amb. bridge. there is way too much particulent matter in the air that we breath..... more truck traffic in the neighborhood is by definition not good for the residents.....as a thirty year resident of this neighborhood, I know that we need to improve the quality of air that we breathe, not to bring more truck traffic here.

Just because the Maroun family has money and power, that doesn't make them right.

I urge you to insist that a complete environmental impact study be done , as is required for all major projects.....

Sincerely, a thirty year resident of southwest Detroit ,

Michael Koehler,,1735 Ste.Anne Detroit, Michigan
