Subject: [Non-DoD Source] Deny DIBC Permit for Second Bridge
Date: Wednesday, February 24, 2016 12:15:14 PM

Dear Mr. Garneau:

It is beyond belief that we again are facing yet another attempt by the Moroun dynasty to build a private bridge at the exact same site this community already loudly and clearly opposed not that long ago!

Nothing has changed since then! The land involved, as before, is not owned by DIBC or the Morouns. No properly conducted Environmental Impact Study has been done, or is even being planned, to my knowledge, which is a travesty since air pollution via diesel trucks will only continue to increase in our already pollutant saturated community.

Please Mr. Garneau! The first priority of government is to protect its citizens. This is not happening now in Detroit where air pollution already is the worst in the state!

I believe this governing body, DIBC, city, state and federal legislators, and the public, all have and have had, access to the more data-driven information that has been published and shared far and wide. The quandry is, why does it continue to be bypassed and ignored?

The health and quality of life of every Detroit citizen including those who reside in neighboring cities as well, depends on the strength of this governing body to do the right thing and DENY this Permit to Build another private international bridge crossing.

Sincerely,

Virginia Zeigler
