Subject: Ambassador Bridge Enhancement Project (Public Notice 09-01-16) application

Dear Mr. Garneau,

My name is Mario Hernandez, and I am resident of southwest Detroit. I am extremely concerned of the negative impacts of this proposal and the fact that it has not met all the requirements of NEPA. First, it relies on the 2009 Environmental Assessment, outdated information that does not reflect the true impact a project of this size will have on the quality of our health and air.

Second, the southwest Detroit community has a long, negative history with the Ambassador Bridge Company. In 2009, the Ambassador Bridge Company tried to do the same thing as it is now doing. They suggest that the second bridge will serve as a replacement and that it will not result in an increase in traffic to our neighborhoods. I simply cannot believe that if the construction of s second bridge will not cause an impact on our air quality. We already don't meet the SO2 required standards.

I oppose the proposal. This project deserves an environmental impact statement and before they can proceed, they must own all the property needed. They don't have legal ownership of Riverside Park.

Sincerely,

Mario Hernandez
